STRENGTHS

PROFILE

Third-year enthusiastic student majoring in Web and Mobile Application Development in the Bachelor of Science in Information Technology. I'm quite interested in web-based systems, and my knowledge of web programming is expanding. Despite my little understanding of programming languages and frameworks, I'm determined to advance my abilities through training and hands-on experience. I pick things up quickly and enjoy collaborating with people to solve challenges and develop a useful web-based system. My objective is to keep honing my web development skills and contribute to useful projects.
